May 2026

NCAA Division I Student-Athlete — Cross Country & Track and Field | 5x All-ACC Academic Honor Roll

Relevant Coursework: Python Programming, Statistical Analysis, Econometrics, Sports Economics, Entrepreneurship

TECHNICAL SKILLS

Languages & Tools: Python, R, Stata, Microsoft Excel

Analytical Methods: Regression Analysis, Hypothesis Testing, Data Visualization, Financial Reporting

ACADEMIC PROJECTS

Econometrics Research — Marital Status & Income | Wake Forest University

- Analyzed IPUMS CPS data in Stata to estimate the effect of marital status on income, running F-tests, heteroskedasticity checks, and VIF diagnostics for multicollinearity

Business Analytics Group Project — Housing Price Prediction | Wake Forest University

In Progress

- Analyzed a Kaggle housing prices dataset in Python and Excel, applying regression analysis and diagnosing multicollinearity among predictor variables
- Interpreted model outputs to identify key drivers of housing price variation

Economics of Crime Research — Adolescent Gambling | Wake Forest University

- Built OLS regression models in Stata on GIBS Youth Survey data to study the relationship between household income and adolescent gambling severity

PROFESSIONAL EXPERIENCE

Accountant | Karen J Gilmore Consulting — Remote

June 2025 – April 2026

- Process customer invoicing, cash receipts, and accounts payable for a remote consulting practice
- Maintain accurate financial records to support day to day business operations

Assistant Coach | Master Sports — San Diego, CA

June–June 2024/2025

- Coached and mentored youth athletes, developing skills, discipline, and teamwork
- Organized practices, drills, and team building activities alongside fellow coaches
